

## ***Illustrations***

Source of a unidirectional data path

Destination of a unidirectional data path

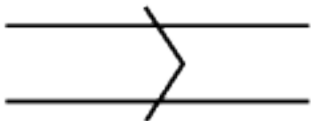

Source and destination of a bidirectional data path

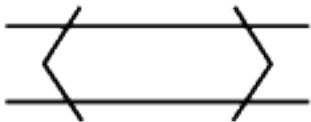

NOTE - The separation of the arrowheads is arbitrary, but they should both appear on the same branch of a junction.

Junction of data paths

Indication of data flow direction

Indication of bidirectional data flow

NOTE - The separation of the arrowheads is arbitrary, but they should both appear on the same branch of a junction.

Crossing without connection
